INTRODUCTION TO THE RX SERIES

Patient care is the primary focus of clinical chemistry testing and Randox has developed the RX series of clinical chemistry analysers for high quality semi-automated and fully automated testing.

With placements in over 120 countries worldwide, the RX series continues to revolutionise a variety of laboratory types including:

- Clinical Laboratories
- Hospital Laboratories
- University & Educational Institutes
- Research Laboratories
- Veterinary Laboratories
- Food & Wine Laboratories

The RX series combines robust hardware and intuitive software with the world leading RX series test menu, including routine chemistries, specific proteins, lipids, therapeutic drugs, drugs of abuse, antioxidants and diabetes testing.

Renowned for quality and reliability, the RX series has one of the most extensive dedicated clinical chemistry test menus on the market guaranteeing real cost savings through consolidation of routine and specialised tests onto a single platform. This extensive dedicated test menu of high quality reagents guarantees excellence in patient care ensuring unrivalled precision and accuracy reducing costly test re-runs or misdiagnosis and offering complete confidence in results.

To find out more visit [randox.com/clinical-chemistry-analysers/](https://www.randox.com/clinical-chemistry-analysers/)

» THE RX SERIES

170 photometric tests per hour

The RX monaco is a fully automated solution for low to mid volume clinical chemistry testing offering the ultimate in convenience, performance and confidence. At optimal configuration, the RX monaco performs 170 tests per hour providing cost effective, high quality testing

A high performance semi-automated analyser

The RX misano has been developed with the user in mind by incorporating a responsive touch-screen display. The sleek ergonomic design boasts intuitive user-friendly software allowing for test menu personalisation for ease of use. The RX misano is capable of high standard, precise results at a competitive price per test

270 photometric tests per hour or 450 tests per hour with ISE

The RX daytona+ is a fully automated, benchtop, clinical chemistry analyser capable of performing high quality testing on a compact analyser, for accurate results you can trust. The most versatile analyser in its class, the RX daytona+ combines robust hardware and intuitive software with the world leading RX series test menu for unrivalled performance

400 photometric tests per hour or 560 tests per hour with ISE

The RX imola is a cost effective system that delivers consistent high quality results. Capable of handling the workload of a medium to high throughput laboratory the RX imola provides rapid, comprehensive testing on a small footprint analyser. The RX imola is a fully automated system with random access and STAT sampling functionality, boosting productivity and saving time when it matters most

800 photometric tests per hour or 1200 tests per hour with ISE

Capable of running up to 1,200 tests per hour, with direct HbA1c testing capabilities, the RX modena consolidates all your assay requirements onto one intuitive platform. The RX modena boasts icon based, interactive touch-screen technology adding a modern flair to your laboratory

A high performance, semi-automated clinical chemistry analyser

The RX misano shines a new light on semi-automated clinical chemistry testing with increased auto-functionality and ground-breaking technology. Revolutionising the RX series with its bold look, innovative design, and outstanding performance, it sets the benchmark for the next generation of the RX series clinical chemistry analysers. The RX misano is capable of high standard, precise results at a competitive price per test.

MAIN FEATURES OF THE RX MISANO

- Large 7" touch screen
- Icon based software
- USB 2.0 port
- Minimal daily maintenance
- Automatic flagging of testing errors
- Switch between multiple languages
- Advanced password protection function
- Ability to run flow cell and cuvette mode
- Advanced QC software
- Humidity and temperature sensors
- One year warranty as standard plus unrivalled technical support from Randox

BENEFITS OF THE RX MISANO

Extensive dedicated RX series test menu

- Expand testing capabilities on one intuitive compact platform with the world leading RX series test menu
- Ability to perform both routine and specialised testing
- Capable of analysing a variety of sample types, including: Serum, Plasma, Urine & Wine

Optimum Performance

- Automatic flagging of errors ensures timely troubleshooting for accurate results
- Advanced QC software allows performance to be monitored at all times
- Advanced password protection function ensures confidentiality of results

Flexibility

- Extremely small footprint, takes up minimal space in the laboratory and is easily transported
- Up to 10 wavelengths can be generated via solid state filter device (340-700nm standard)
- Ability to run both flow cell and cuvette mode
- 3 levels of password protection available enabling different user access levels

Excellent Functionality

- Multiple languages available for extra convenience
- Intuitive icon based, touch screen technology for ease of use
- USB port for importing Randox defined test menus, and exporting patient, QC and Calibration results
- Minimal maintenance required, simple on screen instructions will guide the user through maintenance steps required

SYSTEM OVERVIEW

Cuvettes & Flow Cell

- Option to run flow cell or cuvette mode ensures a maximum number of chemistries can be performed on one system
- Flow cell washing avoids contamination ensuring accurate results are produced

USB Port

- USB port for importing Randox-defined test menus and exporting patient, QC and calibration results
- Enables the user to quickly export results from the analyser

LCD Touch-Screen Display

- Quality display on a large 7" LCD touch-screen responsive even when wearing lab gloves
- Simple on screen icon based navigation allows the user to efficiently complete their testing with minimal effort

Advanced Password Protection

- Advanced password protection functions for analyser setup, assay management and QC result inclusion/exclusion
- This gives laboratories confidence that their results are well protected on this system and only those who are authorised can gain access

A compact fully automated solution for high quality clinical chemistry testing

The RX monaco is a fully automated, cost effective solution for low to mid volume clinical chemistry testing offering the ultimate in convenience, performance and confidence. The RX series test menu allows for complete consolidation of routine and specialised testing onto one efficient, easy to use platform.

MAIN FEATURES OF THE RX MONACO

- 170 photometric tests per hour
- 120 semi-permanent cuvettes
- Low water consumption of 5.5 litres per hour at maximum throughput
- Grating spectrophotometry system generating 12 wavelengths ranging from 340-800nm
- Sample Dead Volume 100µl
- Easy to use Windows® based software
- One year warranty as standard plus unrivalled technical support from Randox

BENEFITS OF THE RX MONACO

Robust, Reliable, Easy-to-Use

- Low maintenance requirements
- Online help guide available to assist user with analyser functions, troubleshooting and maintenance queries
- Integrated barcode readers for reagent and sample identification
- User friendly Microsoft Windows® based software
- Generation of Levey-Jennings charts, calibration curves and QC statistics

Extensive dedicated Test Menu

- Extensive test menu covering routine chemistries, specific proteins, lipids, antioxidants, diabetes and veterinary testing
- Capable of analysing a variety of sample types: Serum, Plasma and Urine

Optimum Performance

- Cuvette check function ensures only clean and viable reaction vessels are used
- Built in inventory management system automatically reports remaining reagent volume
- Sample volume of just 3 - 35µl (0.1µl increments)

Flexibility

- Available as a bench top or floor standing model
- User defined QC multi-point rules
- Calibration options include 1 point, 2 point, multi-point & non-linearity method
- QC history can be viewed
- 3 levels of password protection available enabling different levels of access

SYSTEM OVERVIEW

Wash Station

- 12 stage washing system which includes acid, alkali and pure water wash steps
- Independent stirring system automatically rinsed with purified water to reduce carryover

Reagent & Sample Carousel

- Shared reagent and sample carousel with 66 user defined positions
- Cooled reagent and sample carousel (removable) ensures reagent, controls and calibrators can be stored on-board the analyser without compromising stability

Reaction Carousel

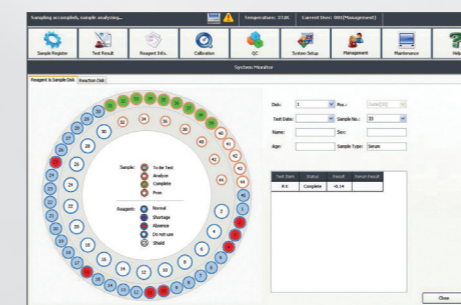

- Reaction system with 120 semi-permanent optical plastic cuvettes
- 15 second cycle time

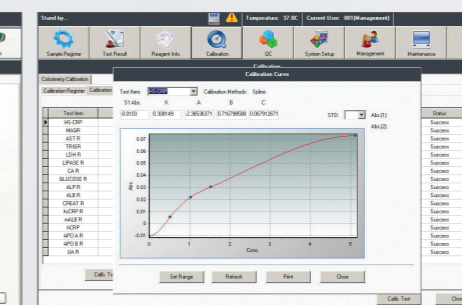

Pipette

- Single reagent and sample pipette with liquid level detection and collision protection
- Rinsed inside and out (warm water rinsing)

A fully automated clinical chemistry analyser with unrivalled performance

The RX daytona+ is a fully automated, random access, bench top analyser. The comprehensive and flexible test menu on the RX daytona+ allows consolidation of a wide range of routine and specialised tests onto one, easy to use, platform. Direct, on-board, HbA1c testing capabilities allow HbA1c tests to be run immediately as there is no sample incubation step required, saving time in the laboratory.

MAIN FEATURES OF THE RX DAYTONA+

- 270 photometric tests per hour
- Optional ISE unit which enables a total throughput of 450 tests per hour
- 72 semi-permanent cuvettes on-board with cuvette check function and 12 stage washing process
- 12 wavelength options ranging from 340-800nm
- Low water consumption of 5 litres per hour at maximum throughput
- Standard and Paediatric sample cups can be used on-board
- Sample Dead Volume 150µl for primary samples
- Sample Dead Volume 100µl for paediatric samples
- One year warranty as standard plus unrivalled technical support from Randox

+ BENEFITS OF THE RX DAYTONA+

Optimum Performance

- Built in inventory management system automatically reports remaining reagent volume
- Separate sample and reagent pipettes including liquid level sensors, crash protection and clot detection
- Dual 5 speed stirrers optimised for each assay ensuring better performance
- Sample volume of just 1.5µl (0.1µl increments)

Excellent Functionality

- User friendly Microsoft Windows® based software.
- Generation of Levey-Jennings charts, calibration curves and QC statistics
- Minimal maintenance required
- Integrated barcode readers for reagent and sample identification

Extensive Dedicated Test Menu

- Extensive test menu covering routine chemistries, specific proteins, lipids, therapeutic drugs, drugs of abuse, antioxidants, diabetes and veterinary testing
- Capable of analysing a variety of sample types: Serum, Plasma and Urine
- Direct HbA1c testing capabilities

Flexibility

- Cooled reagent carousel ensures reagents can be stored on-board the analyser without compromising stability
- Option to use standard sample cups or paediatric cups for small sample volumes
- Calibration options include: Factor, Linear, Point to point, Log-logit, Exponential, Spline and Spline 2
- QC history can be viewed
- 3 levels of password protection available enabling different levels of access

SYSTEM OVERVIEW

Reagent Carousel

- Versatile reagent carousel with 50 cooled positions
- Reagent carousel is removable

Wash Station

- 12 stage washing process
- Water consumption is maximum of 5 litres per hour

Sample Carousel

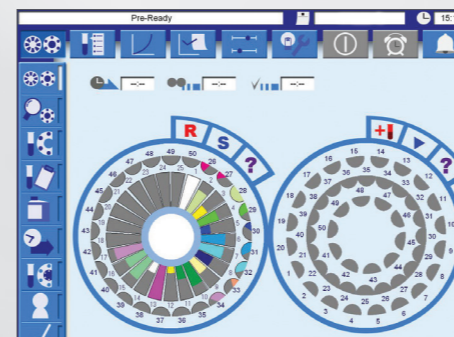

- Universal sample carousel with 40 positions and 10 control/calibrator positions
- Sample carousel is removable

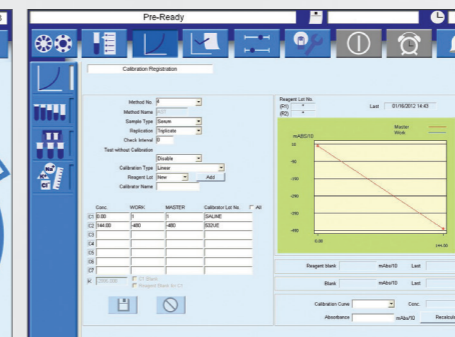

Cuvettes

- 72 semi-permanent reaction cuvettes
- Cuvette check function ensures only clean and viable reaction vessels are used

Rapid, comprehensive clinical chemistry testing

The RX imola is a cost effective system that delivers consistent high quality results. Capable of handling the workload of a medium to high throughput laboratory the RX imola provides rapid, comprehensive testing on a small footprint analyser.

MAIN FEATURES OF THE RX IMOLA

- 400 photometric tests per hour
- 560 tests per hour including ISE
- 90 permanent Pyrex® cuvettes, with 8 stage washing
- 12 wavelength options ranging from 340-800nm
- Water consumption of 18 litres per hour
- Standard and Paediatric sample cups can be used on-board
- Sample Dead Volume 150µl for primary samples
- Sample Dead Volume 100µl for paediatric samples
- One year warranty as standard plus unrivalled technical support from Randox

+ BENEFITS OF THE RX IMOLA

Optimum Performance

- Long life span cuvettes of approx. 5 years
- Built in inventory management system to monitor reagent volumes and remaining number of tests
- Capable of a medium to high throughput
- Sample volume of just 2-35µl (0.1µl increments)

Extensive Dedicated Test Menu

- Extensive test menu covering routine chemistries, specific proteins, lipids, therapeutic drugs, drugs of abuse, antioxidants, diabetes and veterinary testing.
- Capable of analysing a variety of sample types: Serum, Plasma and Urine
- Direct HbA1c testing capabilities

Excellent Functionality

- User friendly Microsoft Windows® based software
- Generation of Levey-Jennings charts, calibration curves and QC statistics
- Daily maintenance takes less than 5 minutes
- Integrated barcode readers for reagents and sample management

Flexibility

- Calibration options include: Factor, Linear, 2 Point, Point to point, Spline, Log-logit and Exponential
- QC history can be viewed
- 3 levels of password protection available enabling different levels of access

SYSTEM OVERVIEW

Reagent Carousel

- 60 cooled reagent positions on the reagent carousel ensures reagents can be stored on-board the analyser without compromising stability
- Automatic barcode reagent identification

Wash Station

- 8 stage washing system
- Includes acid, alkali and pure water wash steps
- Cuvettes have curved inner surface to aid efficient cleaning and drying

Sample Carousel

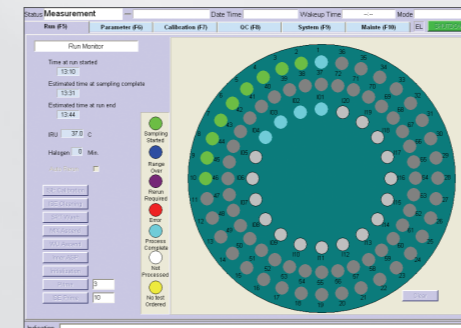

- Universal sample carousel with 72 positions
- Reagent and sample carousels are removable
- 20 cooled positions available for controls and calibrators

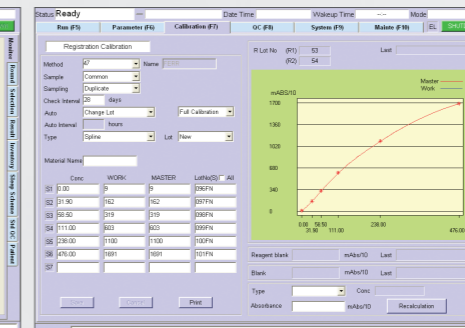

Pipette

- Dual micro-pipettes with liquid level sensors, clot and bubble detection
- Dual 5 speed stirrers optimised for each assay ensuring better performance

A superior high throughput, fully automated clinical chemistry analyser

The RX modena is a high volume, floor standing fully automated clinical chemistry analyser. With a throughput of 1,200 tests per hour, combined with the ever expansive, unrivalled RX series test menu, the RX modena offers a winning combination for large, multi-disciplinary laboratories.

MAIN FEATURES OF THE RX MODENA

- 800 photometric tests per hour
- 1,200 tests per hour including ISE
- Fully automated on-board haemolysis function for HbA1c testing
- Continuous loading hatch
- Reagent carousel with 100 cooled positions
- Removable sample carousel with 94 sample positions and 10 positions for controls and calibrators
- Water consumption of 20L per hour
- Advanced QC capabilities – daily, monthly and batch QC with data archiving, Levey Jennings charts, Automatic QC and Automatic calibration
- Minimal maintenance required
- One year warranty as standard plus unrivalled technical support from Randox

BENEFITS OF THE RX MODENA

Optimum Performance

- Built in inventory management system automatically calculates remaining reagent volume and the number of tests available, alert for shortage, expired reagent and expired calibration
- Automatic test re-run function with diluted, reduced or increased sample volume saves time and reduces risk of human error
- Automatic sample dilution
- Continuous loading allows samples to be added during run enhancing productivity

Excellent Functionality

- User friendly Microsoft Windows® based software
- Interactive touch-screen technology
- Barcode readers for both sample and reagent identification
- Simple twice yearly preventative maintenance

Extensive Dedicated Test Menu

- Large range of tests available, including routine and unique assays optimised for superior performance
- Ability to run specific proteins removes the need for a separate nephelometry system
- Direct HbA1c testing capabilities

Flexibility

- 13 wavelengths generated via diffraction grating (340 - 800nm)
- Capable of running end point, 2 point end rate, 2 point rate and ISE
- 7 different calibration options available including: Factor, Linear, Point to point, Log-logit, Exponential, Spline and Spline 2

SYSTEM OVERVIEW

Reagent Carousel

- Reagent carousel with 100 cooled positions
- Dedicated twin reagent micropipette & dedicated sample pipette both equipped with liquid level sensors and crash detection
- Automatic barcode reagent identification

Wash Station

- 7 stage washing system
- Economic platform with water consumption of less than 20 litres per hour at peak use

Sample Carousel

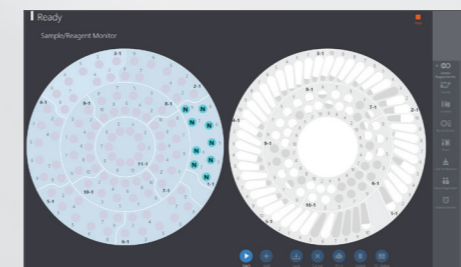

- Removable sample carousel with 94 positions for samples, and 10 positions for controls and calibrators
- Sample pipette equipped with bubble detection and 3 levels of clot detection

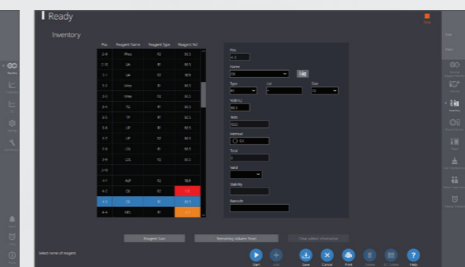

Reaction System

- 153 cuvettes onboard with cuvette check function ensuring only clean and viable reaction vessels are used
- Separate sample and reagent pipettes to minimise carryover

» GLOBAL REACH. LOCAL SUPPORT

Innovation and customer care are both our commitment and our passion. Our focus is on providing you with world-class customer service and maintaining excellent relationships with all of our customers.

With over 35 years' experience, we fully understand the demands and needs of the clinical chemistry laboratory and recognise the importance of maintaining a consistent workflow of high quality results. Our team of trained engineers are on hand to work with you in preserving the continuity of your operations while maximising the potential of your RX series instrument. We know time is critical in any laboratory and our global network means we are uniquely positioned to meet your needs with local service and support.

Minimal downtime is one of the most important considerations in a laboratory setting and we are here to ensure that your analyser experiences as little downtime as possible. We will support your laboratory in providing efficient and effective

patient care and are committed to maintaining the integrity of your laboratory through unrivalled support and a genuine understanding of your needs.

We take pride in our analysers, and realise how important they are to your laboratory and to patients. Servicing your RX series analyser is essential in ensuring continuous productivity and maintaining the highest quality of results you come to expect from the RX series clinical chemistry analysers. The quality of laboratory test results is dependent on the performance of your analyser; therefore the importance of servicing and preventative maintenance cannot be overstated. Regular servicing as a preventative measure is one of the best ways to ensure that you get optimal results from your RX series instrument.

» EXPECT EXCELLENCE

OUR PEOPLE

You should expect excellent service every time you make contact with us. That is why we train every member of our team to the highest possible standard to ensure that you receive the highest quality of customer service that you deserve, thus ensuring you enjoy a consistent, helpful and stress-free experience.

DEDICATED RX SERIES REAGENTS

The RX series has one of the most extensive dedicated test menus on the market, giving biochemistry laboratories the opportunity to advance their routine and niche testing. We ensure all tests are optimised and validated on RX systems for unrivalled performance.

SPECIALIST OFFERINGS

The RX series test menu goes beyond routine chemistries. At Randox we re-invest significantly in research and development to ensure we meet the ever changing needs of laboratories. As a result, the extensive range of reagents offered in the RX series test menu includes niche tests such as; sLDL, Lipoprotein(a), H-FABP, Cystatin C, TxBCardio, HDL2/3-C, Adiponectin, Homocysteine, Copper, D-3- Hydroxybutyrate, G-6-PDH, Non-Esterified Fatty Acids, Total Antioxidant Status and Zinc.

For more information on the tests we offer visit randox.com/complete-rx-test-menu/
Or send us an email

theRXseries@randox.com

» RANDOX - A GLOBAL DIAGNOSTIC SOLUTIONS PROVIDER

Randox has been supplying laboratories worldwide with revolutionary diagnostic solutions for over 35 years. Our experience and expertise allow us to create a leading product portfolio of high quality diagnostic tools which offer reliable and rapid diagnosis. We believe that by providing laboratories with the right tools, we can improve health care worldwide.

REAGENTS

Randox offers an extensive range of diagnostic reagents, giving biochemistry laboratories the opportunity to advance their routine and niche testing.

The Randox reagents range goes beyond routine chemistries. At Randox we re-invest significantly in research and development to ensure we meet the ever changing needs of the laboratory. As a result, the esoteric reagents range from Randox is extensive and includes sLDL, Lipoprotein(a), H-FABP, Cystatin C, TxBCardio, Adiponectin, Bile Acids, Copper, D-3-Hydroxybutyrate, G-6-PDH, Non-Esterified Fatty Acids, Total Antioxidant Status and Zinc.

Randox Reagents provide a number of benefits for the laboratory: Cost savings through excellent stability, automated methods and standards supplied with some kits; confidence in results with high performance methods, minimal interferences and wide measuring ranges; convenience and choice with applications for over 100 biochemistry analysers; liquid ready-to-use reagents, a wide range of kit sizes and complementary controls and calibrators.

ACUSERA

Randox is a world leading manufacturer of multi-analyte, true third party controls. Thousands of laboratories rely on us to accurately assess test system performance and ultimately empower them with the confidence required to release patient test results. With more than 390 analytes available across the Acusera range we can uniquely reduce the number of individual controls required while simultaneously reducing costs, time and storage space. A choice of formats are available, including liquid or lyophilised, ensuring flexibility and suitability for laboratories of all sizes and budgets.

Some of our principle products include Clinical Chemistry, Immunoassay, Urine, Immunology/Proteins, Cardiac Markers and Therapeutic Drugs among others. As a primary manufacturer, Randox are also able to offer the unique service of custom made controls.

RIQAS

Boasting over 45,000 participants and more than 360 parameters across 32 comprehensive & flexible EQA programmes, RIQAS is the largest international EQA scheme. Designed to cover all areas of clinical testing, each of our multi-analyte programmes benefit from a wide range of concentrations, frequent reporting, rapid feedback and informative yet user-friendly reports.

BIOCHIP ARRAY TECHNOLOGY

Biochip Array Technology (BAT) is an innovative assay technology for multi-analyte screening of biological samples in a rapid, accurate and easy to use format. BAT offers highly specific tests, coupled to highly sensitive chemiluminescent detection, providing quantitative results in easy to interpret reports. Randox BAT assays offer diagnostic, prognostic and predictive solutions across a variety of disease areas including sexually transmitted infection, cardiovascular disease (CVD), familial hypercholesterolemia (FH), colorectal cancer and respiratory infection.
