Cell Culture Flasks

Unsurpassed protection of your cells from contaminants was one of the key requirements in developing the new Eppendorf Cell Culture Flasks. A new, advanced air filter technology combines excellent protection with reliable gas exchange. The unique ConvexAccess™ neck significantly facilitates the access to the Eppendorf flasks and makes the cell handling and media exchange much more convenient, safe and reliable.

Cell Culture Plates

Experience unprecedented convenience and safety for your plate-based cell culture experiments. Eppendorf Cell Culture Plates are tailored for the expansion of smaller cell numbers as well as for cell-based assays. Easy orientation and fast identification of individual wells due to the unique contrast rich well ID and the alphanumeric OptiTrack® labeling is now available for cell culture! A significantly improved planarity and the reduction of the meniscus of liquids in the wells result in an optimized optical performance in your assays.

Cell Culture Dishes

Whenever you need direct access to your cells, dishes are the format of choice. We focused on improved handling and stacking performance of the dishes to provide a reliable and extra safe usage of those formats in cell culture. The corrugated handling ring and the SplashProtect™ ring inside the lid provide unsurpassed safety during transportation and expansion of cells.
